CI Game Project Group B3

System Requirements:

Desktop or Laptop PC - Minimum Requirements

CPU	• **Windows:** x86_32 CPU with SSE2 support, x86_64 CPU with SSE4.2 support, ARMv8 CPU ○ *Example: Intel Core 2 Duo E8200, AMD FX-4100, Snapdragon X Elite* • **macOS:** x86_64 or ARM CPU (Apple Silicon) ○ *Example: Intel Core 2 Duo SU9400, Apple M1* • **Linux:** x86_32 CPU with SSE2 support, x86_64 CPU with SSE4.2 support, ARMv7 or ARMv8 CPU ○ *Example: Intel Core 2 Duo E8200, AMD FX-4100, Raspberry Pi 4*
GPU	• **Forward+ renderer:** Integrated graphics with full Vulkan 1.0 support, Metal 3 support (macOS) or Direct3D 12 (12_0 feature level) support (Windows) ○ Example: Intel HD Graphics 510 (Skylake), AMD Radeon R5 Graphics (Kaveri) • **Mobile renderer:** Integrated graphics with full Vulkan 1.0 support, Metal 3 support (macOS) or Direct3D 12 (12_0 feature level) support (Windows) ○ Example: Intel HD Graphics 510 (Skylake), AMD Radeon R5 Graphics (Kaveri) • **Compatibility renderer:** Integrated graphics with full OpenGL 3.3 support or Direct3D 11 support (Windows). ○ Example: Intel HD Graphics 2500 (Ivy Bridge), AMD Radeon R5 Graphics (Kaveri)
RAM	• **For native exports:** 2 GB • **For web exports:** 4 GB

Storage	150 MB (used for the executable, project files and cache)
Operating System	• **For native exports:** Windows 10, macOS 10.13 (Compatibility), macOS 10.15 (Forward+/Mobile, Vulkan), macOS 13.0 (Forward+/Mobile, Metal), Linux distribution released after 2018 • **Web editor:** Recent versions of mainstream browsers: Firefox and derivatives (including ESR), Chrome and Chromium derivatives, Safari and WebKit derivatives.

Mobile device (smartphone/tablet) - Minimum Requirements:

CPU	• **Android:** SoC with any 32-bit or 64-bit ARM or x86 CPU ○ *Example: Qualcomm Snapdragon 430, Samsung Exynos 5 Octa 5430* • **iOS:** SoC with any 64-bit ARM CPU ○ *Example: Apple A7 (iPhone 5S)*
GPU	• **Forward+ renderer:** SoC featuring GPU with full Vulkan 1.0 support, or Metal 3 support (iOS/iPadOS) ○ Example (Vulkan): Qualcomm Adreno 505, Mali-G71 MP2, Apple A12 (iPhone XR/XS) ○ Example (Metal): Apple A12 (iPhone XR/XS) • **Mobile renderer:** SoC featuring GPU with full Vulkan 1.0 support, or Metal 3 support (iOS/iPadOS) ○ Example (Vulkan): Qualcomm Adreno 505, Mali-G71 MP2, Apple A12 (iPhone XR/XS) ○ Example (Metal): Apple A12 (iPhone XR/XS) • **Compatibility renderer:** SoC featuring GPU with full OpenGL ES 3.0 support ○ Example: Qualcomm Adreno 306, Mali-T628 MP6, Apple A7 (iPhone 5S)

RAM	• **For native exports:** 1 GB • **For web exports:** 2 GB
Storage	150 MB (used for the executable, project files and cache)
Operating System	• **For native exports:** Android 6.0 (Compatibility), Android 9.0 (Forward+/Mobile), iOS 12.0 (Forward+/Mobile, Vulkan), iOS 16.0 (Forward+/Mobile, Metal) • **Web editor:** Recent versions of mainstream browsers: Firefox and derivatives (including ESR), Chrome and Chromium derivatives, Safari and WebKit derivatives.

Known Errors:

No known errors as of now.
